Experience

WEB DEVELOPER

Company Name | Tart Labs, Coimbatore
Dec 2022- Present

Web App Developement For Nursing Community:

- Experience working with MySQL, MongoDB, PostgreSQL
- PHP Frameworks: Laravel, Symfony
- Unit testing
- Experience working with Microsoft Graph API, Stripe, PayPal, zoom, and AWS
- Understanding of Agile, SCRUM, and Git workflows
- Design and implement an application from scratch

Responsibilities Include:

- Define the database schema to store user data, groups, meetings, materials, and case studies. Consider relationships between tables.
- Use Laravel's migration and seeding features to create and populate the database.
- Implement user registration and login functionality.
- Create user roles, such as nurses, administrators, and moderators.
- Allow users to create and join groups.
- Implement group management features, including the ability to invite members, set group roles, and edit group details.
- Implement a calendar or scheduling system for meetings.
- Allow users to create, join, and manage meetings within groups.
- Implement features for scheduling, reminders, and meeting history.
- Create a system for users to upload and share materials, such as documents, presentations, and links.
- Implement notifications for various events, such as new meetings, group invitations, or updates to materials and case studies.
- Implement proper authorization and authentication mechanisms.
- Design a user-friendly and responsive interface.

Php Developer

Company Name | App Innovation Technology

Aug 2021- Nov 2022

- Addressed complex issues with real-time lead prioritization using Websocket connectivity.
- We have developed user interfaces with modern PHP frameworks, HTML5, CSS, JavaScript, JQuery, and AJAX which improved user satisfaction.
- Developed object-oriented code in Node.js with 100% accordance to industry and company standards,
- Built API following RESTful standards to allow users to submit information by storing data in PostgreSQL.
- Lead and managed a team of developers to create efficient, effective, and aesthetic websites for clients.
- Provide feedback to the development group to improve Agile Project management methods
- Drove continual improvement to system architecture by refactoring old legacy code.
- Coordinated with QA testers for end-to-end unit testing and post-production testing
